

NYC Mesh Community Wi-Fi

Now available in this building!

NYC Mesh is a community-owned network. It is an alternative to your current internet connection. NYC Mesh connects directly to internet backbone networks without ISP fees.

NYC Mesh is owned by the community. You join by buying a mesh router (\$30 to \$100). Your money back if you are not happy.

There is no compulsory monthly fee. You may donate to help us maintain our network.
