

# WHAT IS NYC MESH?

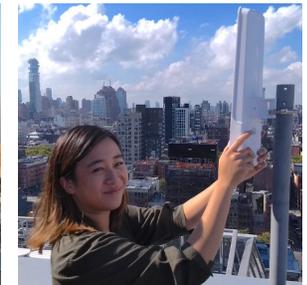

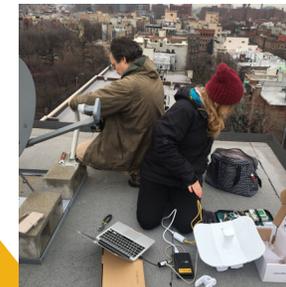

The Internet is a basic utility. Yet unlike any other utility in New York City, access is controlled by private companies that consistently overcharge and underdeliver.

We are a diverse group of New Yorkers who decided to create our own network, NYC Mesh. Our community-owned, not-for-profit network enables us to bypass traditional Internet service providers and cable companies. Taking out the middle-man lets our community get Internet that is faster, more secure, and respectful of privacy. It also means that our community members decide what they are able to afford, not executives or shareholders.

Our network of roof-mounted wireless antennas and fiber is expanding across New York City. Join today to connect your apartment, building, or small business with high-speed, reliable Internet.

*A community-owned network to connect your home or business*

# WHY NYC MESH?

Affordable. Committed to bridging the Digital Divide by connecting underserved communities and eliminating cost and geography as barriers to Internet access.

Neutral. Respect for net neutrality and privacy - no blocking or discriminating content, no throttling data, and no collecting personal information.

Fast. Typical speeds of 50 Mbps and above.

Resilient. Designed to operate when disasters like Hurricane Sandy strike.

Ours. A community-owned non-profit run by your neighbors and volunteers.

## OUR MISSION

We aim to create an open, resilient, and neutral network that is accessible and affordable to all New Yorkers for both daily Internet use and emergency use during power outages or Internet disruptions.

Visit [www.nycmesh.net](http://www.nycmesh.net) today to request a connection and join our community.

Help us identify rooftops to grow our network.
