

# Organization Domains

NYC Mesh uses various domains for network operation and to provide content about NYC mesh to the public. The second level DNS zones for NYC Mesh owned domains are hosted in name.com. The DNS zones are managed via terraform in the [nycmeshnet/nycmesh-dns](#) repository.

Domain	Purpose	Zone Hosed	Content Hosted
nycmesh.net	Main domain	name.com, <a href="#">managed in GitHub</a>	Various
nycmeshconnect.net	Separate site for a project	name.com, <a href="#">managed in GitHub</a>	<a href="#">GitHub Pages</a>
nycmeshconnect.com	Redirects to nycmeshconnect.net	name.com, <a href="#">managed in GitHub</a>	<a href="#">GitHub Pages</a>
themesh.nyc	Redirects to nycmesh.net	name.com, <a href="#">managed in GitHub</a>	<a href="#">GitHub Pages</a>
