

Maintenance Mode

MeshDB has a maintenance mode. It prevents all access to the site, UI, and API while active.

To enable it, run ``manage.py enable_flag MAINTENANCE_MODE`` or POST to the ``/maintenance/enable/`` route

To disable it, run ``manage.py disable_flag MAINTENANCE_MODE`` or POST to the ``/maintenance/disable/`` route

There is also a view in the Admin UI that can enable it, though it will not work for disabling.
